

## TESTIMONIAL

“The therapy and the care here were 100%. The main thing that kept me going was my wife, and getting back home to her.” – **Earl Payton**

*“Vaya con Dios mi amigo bonito”  
(May God be with you my beautiful friend)*

## EARL

Earl came to Morning Breeze for rehab following a stay in the hospital. When we first met him, he was very weak with trouble walking far distances, difficulty completing self-care tasks, reduced balance, difficulty transferring safely from one location to another, and with some confusion and disorientation at times.

With the help of the therapy team and nursing care, Earl was able to make improvements with balance, endurance, activity tolerance, dressing himself, and upper and lower body strength.

Earl is now walking with a cane and has demonstrated improved memory skills and safety awareness. His improvements will allow him to return home and complete his daily tasks safely.

Earls many quotes and jokes have always lightened the mood and we will miss having him around, but we are so glad he is able to return home safely!

Earl is most looking forward to returning home with his wife, whom he loves dearly and she has been his motivation throughout this journey.
