

# Wound Care

## AT ALLIS CARE CENTER

Acute or chronic wounds can take weeks or months to heal, even with special care. We partner with Oak Medical Onsite Physician Services to build a strong wound care program that is patient centered and evidence based.

Oak Medical provides board-certified wound management specialists, nurse practitioners and registered nurses who all contribute their expertise to wound care plans that are coordinated and customized to meet the individual needs of each patient.

### OAK MEDICAL WOUND MANAGEMENT PROGRAM

- Head-to-toe assessment of skin integrity at admission, documenting and staging any existing wounds
- Evidence-based treatment plans and prevention
- Weekly rounds on wound care patients by wound care provider
- Individualized, patient centered care to promote healing
- Certified wound physician on-call for any consultations needed or for visits
- Daily wound rounds by certified wound care team
- Complicated wounds accepted, including chronic wounds, wound vacs, surgical wounds
- Debridement at bedside so no need for wound care clinic visits
- Collaborative relationship with acute care facilities to help streamline care for complex wounds
- IV antibiotics for infected wounds
